Reel Combinations

Using stepper-motor driven reels with 11 symbols and 11 blanks, *S-Slots* are capable of having up to 256 symbols per reel. The stopping positions are determined by a random generator that selects from the reel combinations that are programed into a chip. Below is an example one of the reel symbol combinations utilized on the *Double Jackpot* model, having 64 positions per reel. This slot is a 2-coin, 3-reel machine with a total of 262,144 total combinations.
