BONUS GAME

Quick Hit Bonus Event

Occurs Approximately Every 7 Handlepulls, Max Bet Required

Initiated by appearance of 2 Scattered Bonus Symbols on Reels 2, 3 or 4.

One of three bonuses (Trains, Pawn or Record) will be displayed. Each has 12 credit award values.

The bonus clip plays and then one of the awards will be displayed and awarded

Average Bonus Pay: 163 Credits

Double Bonus Event

Occurs Approximately Every 62 Handlepulls, Max Bet Required

Initiated by appearance of 3 Scattered Bonus Symbols on Reels 2, 3 and 4.

Located above the player is an LCD that displays a spins award card that will start to randomly blink. The spins award card contains spin awards from 5 spins to 12 spins. Player then presses the flashing start button; one of the spin awards will be awarded. The bonus clip plays and then one of the awards will be displayed and awarded

Next, a video game card will be displayed on the LCD on which 16 tiles will randomly drop for each spin. Each character tile represents a different range of credit award values. As the tiles drop, any horizontal, vertical or diagonal adjacent tiles that have the same character touching each other will make a match. The award for each character match depends on how many characters are matched

As each match occurs, within the spin, those tiles are eliminated from the game card, allowing the tiles above to drop down to possibly make more matches. The award for each match is accumulated in the Bonus Win window during each spin and added to the Bonus Total Award after each spin

After all spins are completed, the Bonus Total Award amount is awarded to the player

Average Bonus Pay: 1,423 Credits
