

An established reputation for reliable dispensing of large diameter coins; originally best suited for Casino Slot & Video Poker machines. The DH-750 has now evolved for application in the Transportation, Vending & Amusement Industries.

Features

- COIN OVER-FLOW SWITCH**
 This Model is equipped with a coin over-flow switch, which enables the DH-750 to detect the capacity of coins in the hopper head.
- STABLE DISC ROTATION**
 This model, like most of our hoppers, is equipped with thrust ball bearings beneath the disc, promising reliable dispensing.

General Specifications:

- Applicable Coin Sizes:**
 Diameter: 21.0mm ~ 38.0mm |
 Thickness: 1.5mm ~ 2.5mm
- Coin Capacity (Examples):**
 US 5¢: 1,300
 US 25¢: 1,000
 \$1 Token: 300
- Dispensing Speed (Approximate):**
 US 5¢ - 400 coins/minute*
 US 25¢ - 380 coins/minute
 US \$1 - 200 coins/minute
- Coin Counting Method:**
 Proximity Sensor or Microswitch
- Motor Voltage:**
 24VDC, 115VAC & 220VAC*

**Dispensing speed may vary depending on motor gearbox deceleration ratio or coin specifications.*

**AC Models equipped with Thermal Protection & Instant Stop Device.*

- Current Consumption:**
 3.0A
- Operating Temperature:**
 -10°C ~ +60°C
- Weight:**
 Approx. 12.28 lbs. (AC Motor Specification)
